

Formulated by Autoparts Experts

for Reliability and Longevity

f AISINASIA

AUTOMATIC TRANSMISSION FLUID

Made for original transmissions

ENGINE OIL

Tailored by a world-class engine parts maker

LONG LIFE COOLANT

Made by the world's most trusted water pump manufacturer

AUTOMATIC TRANSMISSION FLUID

From one of the world's largest AT manufacturer

AISIN LUBRICANT FAMILY TREE

COMPREHENSIVE PRODUCT RANGE

AISIN has a wide range of automotive components and lubricants with high quality, safety and affordability. Furthermore, the product lineup is always expanding with AISIN's constant innovation, this brings an ever-increasing benefit to automotive businesses and vehicle owners with AISIN products.

Outstanding Technology Development

Contributing to society through technology development based on a research and development structure expanding across the world.

Conducting evaluations by recreating unique environments around the world

Fujioka Proving Ground (Aichi Prefecture)

Advanced technology development by collaborating with companies in a wide range of industries

Daiba Development Center (in Divercity Tokyo Office Tower)

Excellent Manufacturing

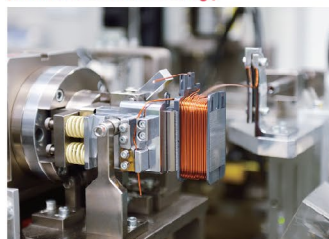

Aisin ceaselessly updates its innovative industrial processes and equipment to create next-generation products.

Cultivating human resources for "monozukuri"

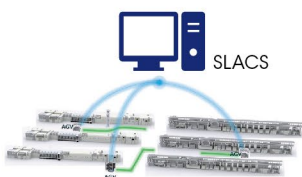

Learning electrical wiring procedures and circuitry design

Pursuing excellence in production technology

High-density coil winding machine for motors

Digital transformation (DX) initiatives in monozukuri

Smart Logistics & Assorting Command System (SLACS), which has achieved flexible production

This system obtains the production status, the operation status of automated guided vehicles (AGVs), etc. in real time to generate and distribute the optimal conveyance plan based on the obtained information, thereby achieving autonomy conveyance with AGVs. Learning electrical wiring procedures and circuitry design.

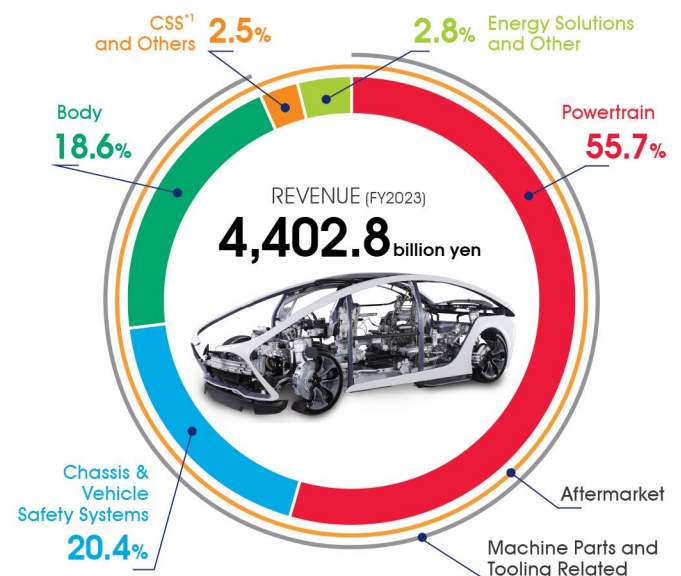

Cohesive Strength as a Group

With specialized expertise in a wide range of business fields, Aisin is able to meet a wide range of needs in areas that range from its automotive parts business to fields such as energy.

Business Strategy
